

LIVE WEBINAR

Jak se připravit na NIS 2

Směrnice EU o kybernetické bezpečnosti přináší firmám rozsáhlé povinnosti

- Jak nastavit bezpečnostní pravidla a procesy?
- Jaké technologie budete potřebovat?
- Jaké specialisty potřebujete najmout?

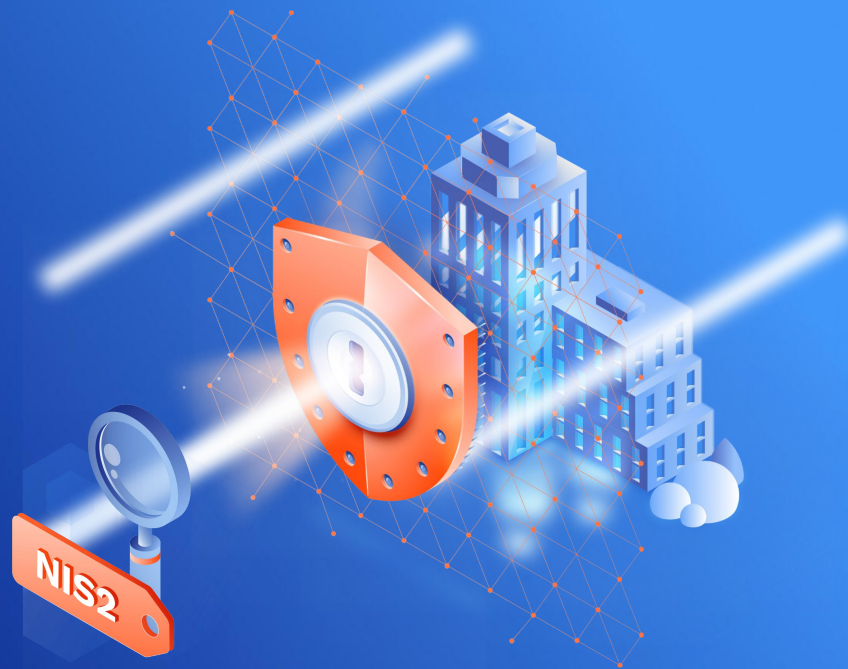

Zero Trust Architektura pro ZoKB / NIS2

Webinář - Jak se připravit na NIS2 / ZoKB

7. listopadu 2024

Ing. Michal Čížek, CEO & Co-Founder

Představení

Ing. Michal Čížek
CEO & Co-Founder
GoodAccess

Network & Security Engineer
15+ years in Cybersecurity

Dnešní realita kybernetické bezpečnosti organizací

Cílový stav

O čem to bude?

Technická infrastruktura pro ZoKB / NIS2

Obecný koncept technologické architektury pro pokrytí tech. opatření ZoKB

Zero Trust

Vysvětlení základních principů Zero Trust Architektury.

Jak řešit Zero Trust Architekturu na úrovni sítě

Představení SASE/SSE platformy GoodAccess

NIS2 & ZoKB

klíčové výzvy kybernetické bezpečnosti

Zajištění provozu kritické služby

Eliminace kyberbezpečnostních rizik, ochrana kritických systémů a infrastruktury

Vícefaktorová autentizace a řízení přístupu podle identity

Centrální správa identit, vícefaktorová autentizace, kontrola zařízení zaměstnanců

Bezpečný vzdálený přístup zaměstnanců

ke kritickým systémům v Cloudu, SaaS, na pobočkách odkudkoli, kdykoli a z vlastních zařízení (BYOD)

Detekce a reakce na hrozby

Logování, vyhodnocování a okamžitá reakce na hrozby a anomálie

Česká technologická aliance

ProID

Logmanager 

The icon for Logmanager consists of a small blue circle followed by a larger blue rounded rectangle.

 **Progress® Flowmon®**

The icon for Progress Flowmon is a green stylized arrow pointing to the right, composed of three parallel lines of increasing length.

Technická infrastruktura pro ZoKB

MSSP (Managed Security Services)

Analýza rizik, ISMS, Procesy
Manažer Kybernetické Bezpečnosti
Management zranitelností & pentesting

GUARDIANS^{CZ}

Koncová zařízení

Endpoint Security (EDR)

Ochrana zařízení
zaměstnance
Antivirus, Detekce a
Reakce na hrozby

Síťová vrstva

Zero Trust Network

Bezpečná síť - perimetr,
Vzdálený přístup, Řízení
přístupu, Segmentace,
Kontrola zařízení, Detekce
a reakce na hrozby

 GoodAccess

Aplikační vrstva

Identita (IAM / MFA)

Digitální identita
zaměstnance
Vícefaktorová
Autentizace (MFA)

ProID

Backup

Zálohování a obnovení

PIM / PAM

Privileged Identity & Access
Management

Security Information and Event Management (SIEM / XDR)

Logmanager 

Sběr, korelace a vyhodnocení logů
Detekce a reakce na anomálie (XDR)

CapEx

Capital Expenses

vs

OpEx

Operating Expenses

Porovnání modelů

Tradiční HW model

Počáteční investice X Kč:

- Počáteční investice na novou HW infrastrukturu
- Nasazení infrastruktury
- Zastarávání HW infrastruktury / výměna HW

Údržba a Aktualizace (15-20% z X ročně):

- HW Podpora
- Údržba a aktualizace

Personální náklady:

- Certifikovaný expert obsluhující infrastrukturu / služba
- Monitoring
- Management Zranitelností (vulnerability scanning)

Životní cyklus: 3 - 5 let

- Technologický pokrok stále rychlejší
- Omezená záruka a podpora
- Výkon a spolehlivost s časem klesá
- Kompatibilita a možnosti integrace s časem klesají

Subscription model

Integrace

- POC - možnost vyzkoušení zdarma
- Jednorázové náklady na integraci služeb s existující infrastrukturou a systémy

Předplatné - provozní náklady

- Měsíční / Roční předplatné Y CZK podle počtu zaměstnanců nebo zařízení
- Aktualizace a údržba zahrnuta v předplatném
- Monitoring a sken. zranitelnosti služby zahrnuto v předplatném

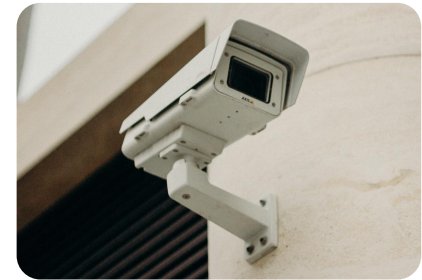

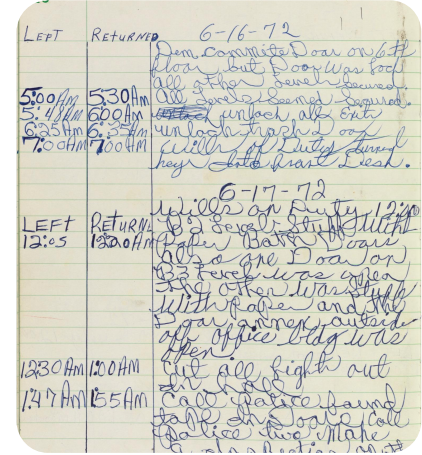

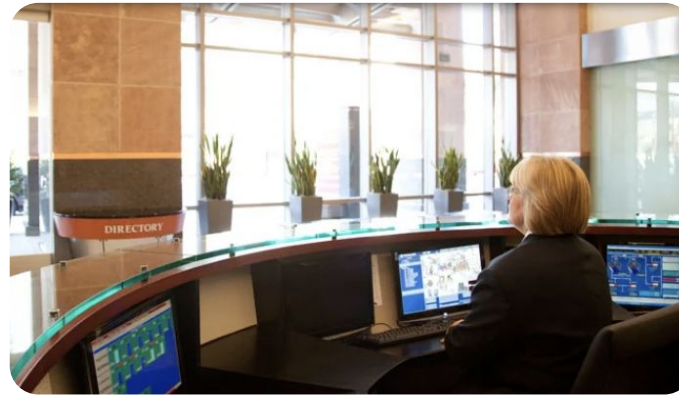

Životní cyklus: ∞

- Dodavatel udržuje technologický pokrok a přidává nové funkce, výkon i možnosti integrace

Zero Trust

Starý svět

Nový svět

55%

Zaměstnanců
pracuje více
vzdáleně než z
kanceláře

32%

Zaměstnanců by
změnilo práci
pokud by nemohli
pracovat na
dálku

Source: Owl labs in 2021

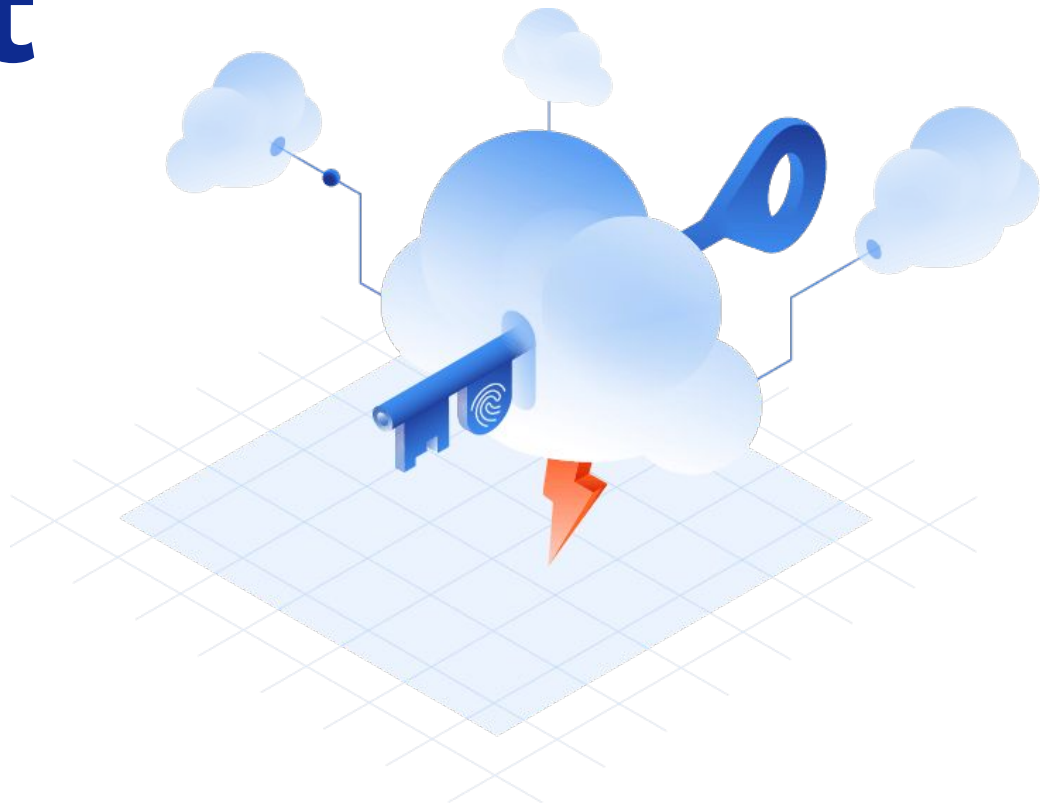

Zero Trust

Proč?

- Plná kontrola
- Plná auditovatelnost
- Výrazně vyšší bezpečnost
- Minimalizace rizik

Nikdy nevěř, vždy ověř

- **Kdo a kdy** vstupuje?
- **Co** tam dělá?

Bezpečné prostředí

ochrana proti **vnějším útokům**

Firemní budova

Zero-Trust Network Perimeter (SDP)

Ověřené identity

ochrana proti **krádeži identity**

Ověření identity

Multi-factor Authentication (MFA / SSO)

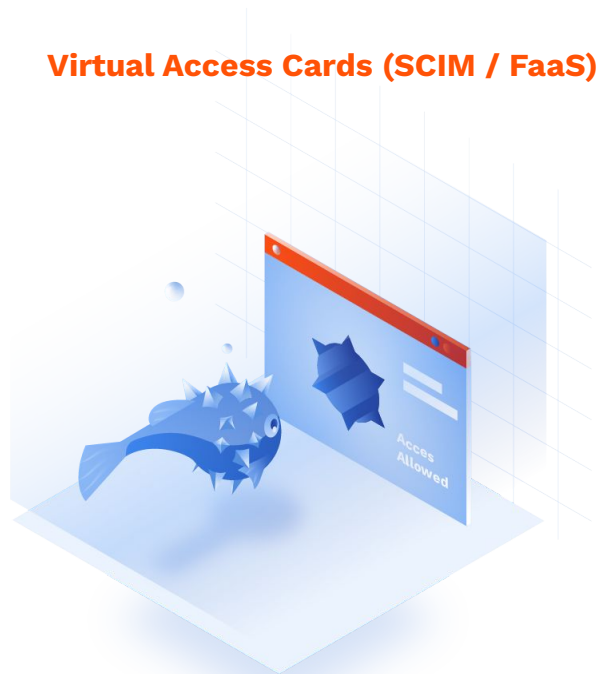

Řízení přístupu

redukce prostoru k útoku - segmentace

Přístupové karty

Virtual Access Cards (SCIM / FaaS)

Bezpečnostní politiky

ochrana proti **útoku zevnitř**

Detektor kovů / bezpečnostní kamery

Threat Blocker / Device Health Check / Anomaly Detection

Evidence

pro potreby **compliance**

Navštěvní kniha

5:00 AM	5:30 AM	floor, but door was locked
5:48 AM	6:00 AM	all other levels secured.
6:25 AM	6:35 AM	All levels seemed secured.
7:00 AM	7:00 AM	unlock unlock all entry
		unlock trash room
		Wells of Duty turned
		key into front desk.
		6-17-72
LEFT 12:05	RETURN 1:30 AM	Wells on Duty 12:00
		to 2 levels. Stuff with
		paper. Bath door
		also open. Door on
		33 level was open
		the other was stuff
		with paper and the
		door annex outside
		off office bldg was
		open.
12:30 AM	1:00 AM	cut all lights out
1:47 AM	1:55 AM	in hall
		Call Walter David

Access Logs

Zero Trust Sit'

SSE (Secure Service Edge)

SDP (Software-Defined Perimeter)

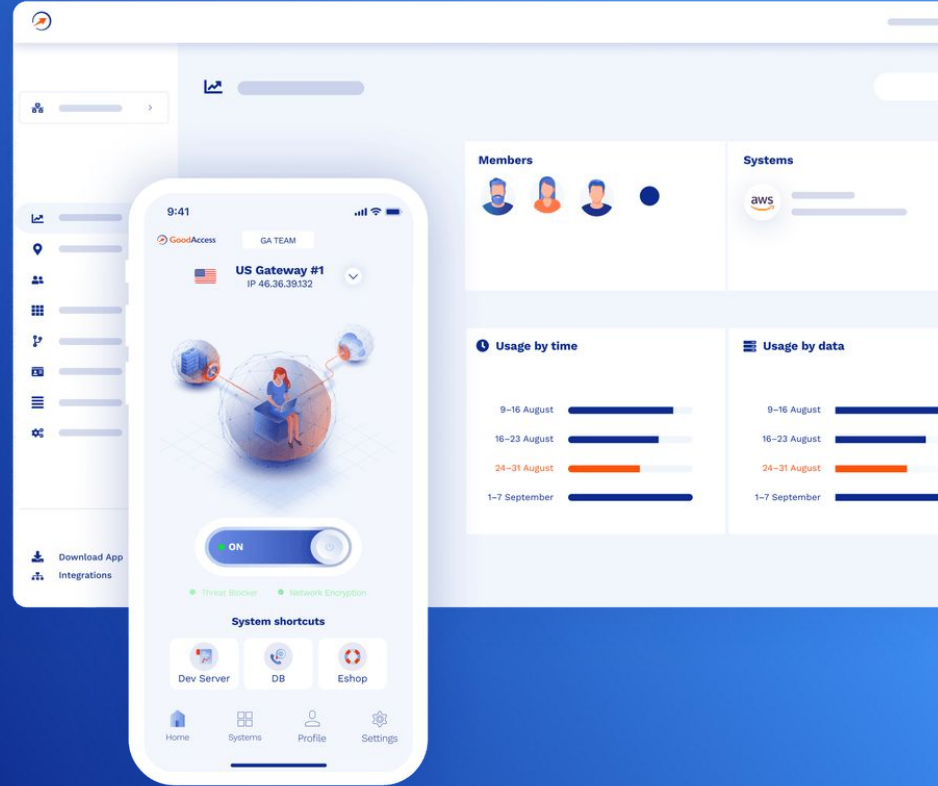

ZTNA (Zero Trust Network Access)

Platforma GoodAccess

Secure Service Edge (SSE)

Stvořeno pro compliance

Komplexní řešení v jediné SASE/SSE platformě

Vzdálený přístup a vlastní zařízení (BYOD)

Automatizované vynucení bezpečnosti vlastních zařízení (Posture Check)

Více-faktorová autentizace (MFA)

Zastřešující řešení MFA pro všechna technická aktiva (vč. starších systémů)

Řízení přístupu podle identity (IAM / FWaaS)

Zero Trust Architektura umožňující řízení přístupu podle identity (SSO/SCIM)

Šifrování a segmentace sítě

Segmentace na maximální granularitě radikálně snižuje možnosti útoku

Plná kontrola a viditelnost

Bezpečnostní logy & reporty napříč celou organizací vč. integrace se SIEM

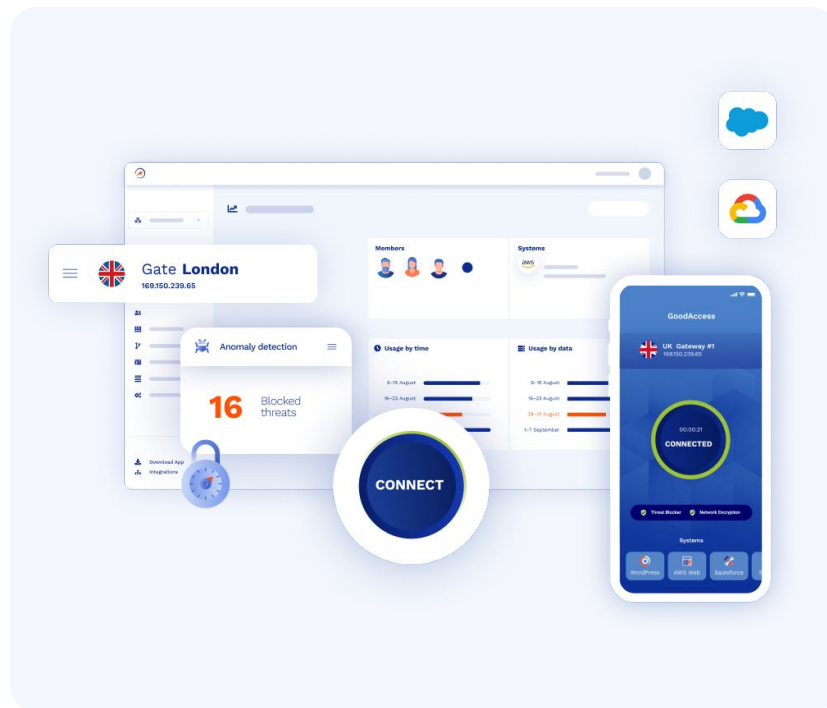

Cloud-Based SSE platform

No-Code / No HW - Zero Trust Network as a Service

Řešení kombinovaná v jediné platformě:

- Software-Defined Network Perimeter (**SDP**)
- Zero Trust Network Access (**ZTNA**)
- Device Management and **Device Posture Check**
- **Network Segmentation**
- Identity based Access Control (**FWaaS / IAM**)
- Multi-Factor Authentication (**SSO/MFA**) on network level
- Phishing Protection (**DNS & Filtering**)
- Security **Logs and Reports**
- *Threat Detection & Response (NDR / XDR) (2025)*

SASE / ZTNA

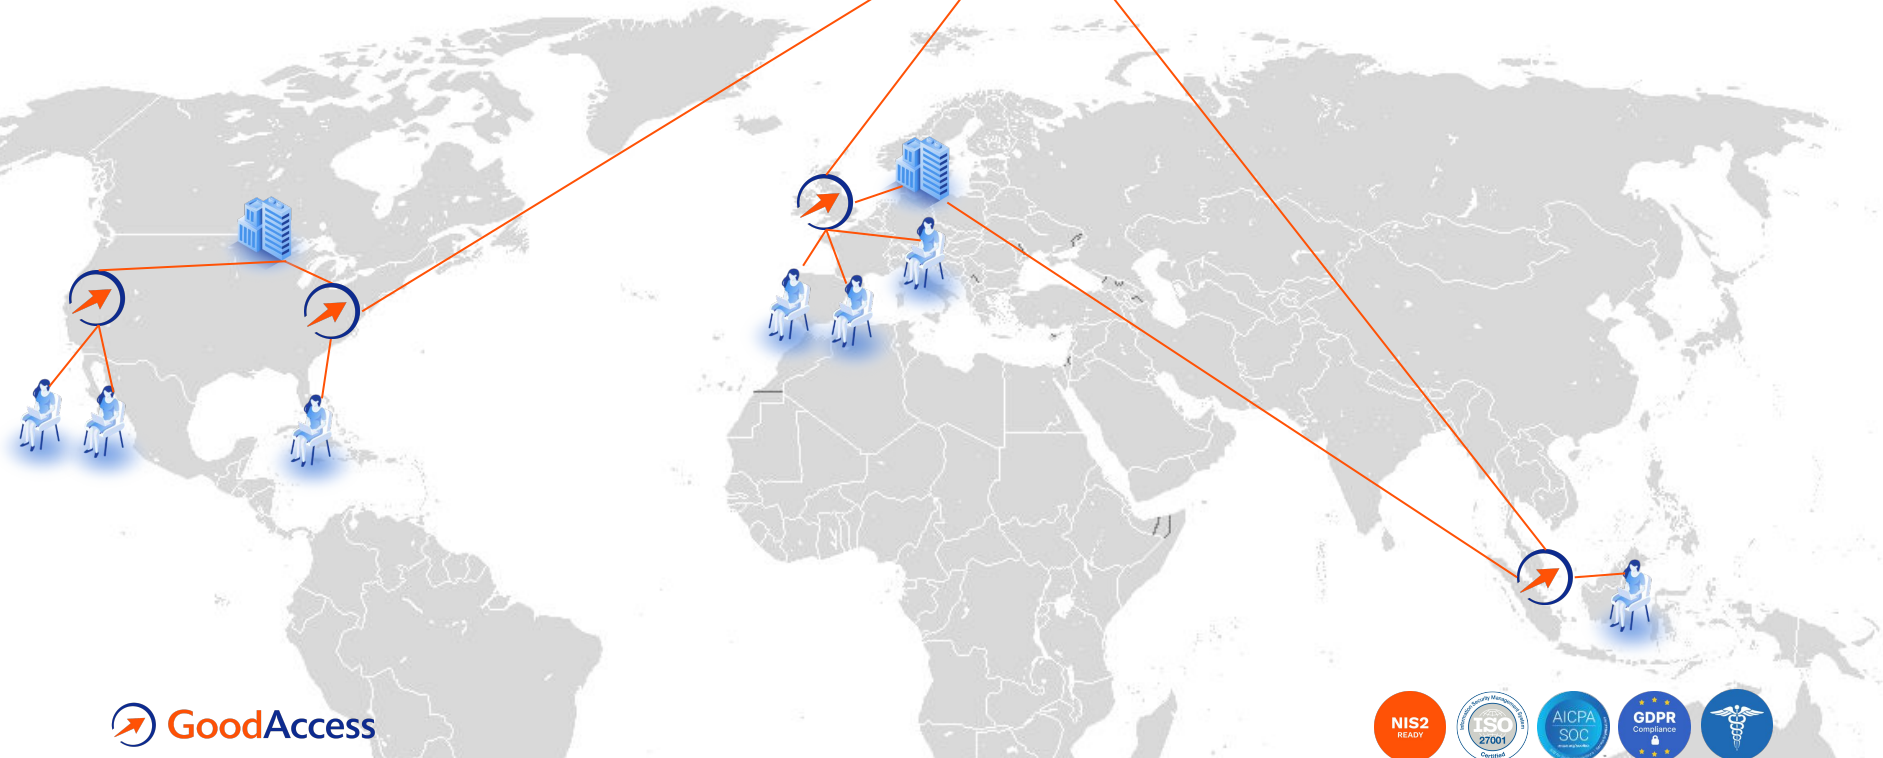

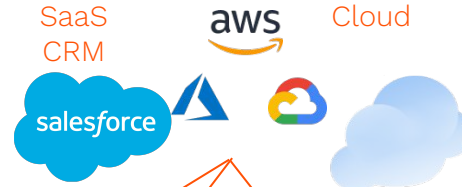

Zero Trust Architektura

Topologický pohled

SASE / ZTNA

Zero Trust Architecture
Geografický pohled

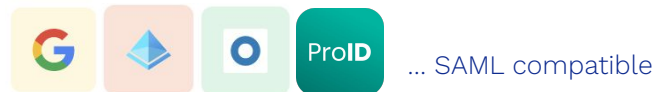

Snadné nasazení do stávající infrastruktury

Krok za krokem

1. Identity - zaměstnanci

Identity Provider IAM / MFA / SSO / SCIM

2. Kritické systémy

Network Segmentation - Define critical systems and it's network location

3. SASE / ZTNA infrastruktura

Gateways, Clouds & Branches (On-Premise), IP Whitelisting

4. Přístupy a bezpečnostní politiky, napojení na SIEM

Access Cards for Users & Groups, Device Posture Check policies
